now being delivered as part of the D.A.R.E. Officer Training. Last summer, the new High School program was released and has proven to be a highly sought after resource for educating students at this vulnerable level. The curricula contains three distinct modules - REAL Messages, My Playbook (with an optional segment for student athletes) and a collection of stand alone presentations, the first of which is Celebrating Safely. The curricula components are independent, but supportive of one another, and can be implemented individually or as a complete suite. This curricula is very officer friendly. Students obtain an on-line identity with DARE, and complete the segments on-line, without the officer being present.

This new curricula offers educators and law enforcement flexible and cost-effective options for providing students with relevant and timely tools to exercise responsible decision making.

New K-2 Curriculum introduced.

A new K-2 curriculum was introduced. It has been updated to meet the needs of our current trends at that age level. New charts have been introduced. The format is the same with the topic picture on front and your lesson plan on the back. If you are teaching this level, even on an occasional basis, just e-mail me and request a copy of the charts and I will get them to you.

As Always, Partners in Prevention.
